Special Issue

Recent Advances in Sustainability Development for Autonomous Systems

Message from the Guest Editors

This Special Issue aims to provide a comprehensive overview of current ideas and findings in the modelling, dynamics analysis, and control of autonomous systems, including those in land, ocean, and aerial transportations. The issue aims to: (i) present the current state-of-the-art about autonomous systems with regard to the design of experiments, field observations, and mathematical modeling; and (ii) identify potential research directions and technologies that will drive innovations in the field of autonomous systems. Additionally, this Special Issue welcomes submissions employing new and emerging technologies and approaches, such as virtual and augmented reality, artificial intelligence, and digital twin modeling. We invite original and innovative research papers with critical perspectives for current and new approaches applied, and we encourage the submission of works investigating new statistical methods to manually or automatically assess the success of models. The papers collected in this Special Issue will cover these topics from diverse multi- and cross-disciplinary perspectives, including theoretical and numerical methods and experimental studies.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
