

Special Issue

Sustainable Building and Sustainable Indoor Environmental Quality (Second Volume)

Message from the Guest Editors

A sustainable building encompasses both the structure and the use of processes that are environmentally responsible and resource-efficient throughout buildings' lifecycle. It covers energy use, water use, indoor environmental quality, material selection, stormwater infiltration and the building energy management. Sustainable indoor environmental quality refers to the conditions inside a building. This Special Issue focuses on, but is not limited to the following topics:

- A combined evaluation of indoor environmental quality and well-being for occupants. The well-being of people is defined in terms of their health, comfort, and happiness;
- Sustainable indoor environmental quality with a holistic perspective and the evaluation of both individual and combined parameters within the indoor air quality, thermal comfort, visual comfort, and acoustical quality, with a focus on the combined effects and evaluation;
- New knowledge within social sustainability and influence on the overall assessment of sustainable buildings;
- Energy-saving and energy flexibility in buildings and clusters of buildings;
- Sustainable renewable energy and energy storage systems.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
