

## Special Issue

# Circular Economy Strategies for Sustainable Development: Applications and Impacts

### Message from the Guest Editor

Circular economy appears as a response to the need to create a more balanced society, which guarantees sustainable development and promotes the regeneration of resources. Specific circular strategies include designing longer lasting products, enhanced services and business models among other approaches, calling upon alternative reusable and recyclable options to lower fossil-based resources consumption, within more energy-efficient processes to emit less or no CO<sub>2</sub> emissions. These contribute to limiting the pollution of natural systems and to restore biodiversity, as resource recirculation for instance in value cascades or repurpose routes are applied instead of end-of-life scenarios. Decarbonising the economy and decoupling growth from the intensive consumption are the ultimate goals to achieve sustainability and a more resilient society. This Special Issue is dedicated to original full length works, reviews or case study applications describing circular economy schemes, as well as their impacts in the environment and in society, as enablers of a healthier environment, a balanced humanity and a successful achievement of sustainable development.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
