## **Special Issue**

# Sustainable Conversion of Renewable Energy Sources

## Message from the Guest Editors

In this Special Issue, we aim to provide ground for up-to-date, fruitful, and actionable insights into economic, social, and environmental sustainability. Original research articles and reviews that use conceptual models, analytical frameworks, or empirical studies from critical perspectives and in different contexts will be considered. These perspectives should indicate their potential to bring about actionable insights and fruitful research outcomes. We welcome experimental, theoretical, and empirical contributions that, within the scope of a multidisciplinary approach, may collectively provide a reference for pressing environmental issues and describe the interaction between renewable fuels, CO2 mitigation, and global warming.

## **About the Journal**

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

#### Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

#### **Author Benefits**

## Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

## **High Visibility:**

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
