

Special Issue

Green and Sustainable Supply Chains

Message from the Guest Editors

As problems caused by global climate change are increasingly obvious, reducing carbon emissions and promoting the recycling of resources have become one of the hot topics of concern. The production activities of manufacturing enterprises are an important source of carbon emissions, and increasing pressure from a variety of external stakeholders to conduct business operations in a sustainable fashion has encouraged companies to mitigate their environmental impact and enter the “green” scene. Manufacturers have then begun to consider investing in low-carbon technologies in their products to improve the green level of their supply chain. This Special Issue will focus on the current global green supply chain and sustainable development trends, as well as the development and use of new technologies, the opportunities and challenges faced by green supply chain and sustainable development, and the current stage of the business model and innovation and other research topics. Research related to the keywords below is welcomed.

- green supply chains
- green logistics
- circular economy
- sustainable supply chain
- green innovation
- environmental regulation
- supply chain finance

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
