

Special Issue

Happiness and Quality of Life in a Sustainable Built Environment

Message from the Guest Editors

This special issue investigates and discusses the relationships between the three fields (sustainability, quality of life and the built environment) and the extent to which the built environment can or should aim to make a positive contribution to these spheres of human life. The issue invites disciplinary specific, multidisciplinary and transdisciplinary contributions, including but not limited to the fields of the built environment, transport, health, psychology, sociology and ethics. Possible topics could include: Paths to sustainability; Visions of sustainability; Built environment and behaviour change; Built environment and nature; Built environment and happiness in an ethical society; Physical and mental wellbeing within a sustainable society; Sustainable happiness; Ethical practices in the built environment.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA
