

## Special Issue

# International Entrepreneurship and Innovation

### Message from the Guest Editors

International entrepreneurship supports economic and social development, employment and job creation, and innovation. As policies have been developed to stimulate sustainable entrepreneurial enterprises, there remains a gap in the deep understanding of entrepreneurship in differing cultures. This Special Issue focuses on cultural differences in sustainable entrepreneurial ventures. Empirical findings with regard to international entrepreneurship would enable the development of specific entrepreneurial knowledge and skills in those desiring to operate sustainable business ventures in various countries around the world. Further, empirical and theoretical findings could provide the impetus for training and development programs for international entrepreneurial organizations. This Special Issue seeks to host a collection of papers that explore the meaning and relevance of international entrepreneurship through a sustainability lens. We are seeking theoretical as well as empirical contributions and would welcome case studies from myriad countries.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
