Natural Resource Use Efficiency in Technoeconomic Sustainability Analysis of Bio-Based Products

Message from the Guest Editors

As the of the Special Issue “Natural Resource Use Efficiency in Technoeconomic Sustainability Analysis of Bio-Based Products” in *Sustainability* (ISSN 2071-1050), we would like to invite you to contribute a research paper with the focus on the sustainability aspects of natural resource use efficiency in technoeconomic analysis of bio-based products. We hope you will find this topic of scientific interest. If you are interested in publishing the results of your research in this Special Issue, you are welcome to send a tentative title and abstract to check their suitability. We are convinced that your contribution will be highly appreciated by our readers. “Bio-based products’ origin is in biological resources.” Their manufacturing involves the use of raw materials, air, water, energy, and land. All resources are extracted from the environment as renewable and non-renewable biotic and abiotic ones. Natural resources are not only production factors, but they also serve as natural habitats of biodiversity, emission sinks, waste dump, and other environmental services.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
