

Special Issue

Placing Climate Action

Message from the Guest Editors

Clear policy signals by international organisations and national governments remain essential. Important decisions are increasingly being made beyond these scales, however, fostering climate action within localities. Meanwhile, it is increasingly being argued that the effective delivery of climate policy ultimately happens through place-based initiatives at the local level and that effective delivery of actions to promote low-carbon and climate-resilient development will require experiments with new governance arrangements. In particular, processes that engage and harness the combined energies of public, private and third sectors and empower the aspirations of engaged individuals are required.

This Special Issue invites research from a range of disciplines that contributes new thinking relating to the praxis of local climate action as well as methods for bridging the gap between theory and practice on climate action at the local level. Articles which explicitly engage with the challenge of enacting theories and imaginaries of sustainable futures in practice are particularly welcome.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon
School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
