

## Special Issue

# Sustainable Development and Property Markets

### Message from the Guest Editors

Despite the fact that many studies have been devoted to understanding how sustainable development can deliver a more sustainable real estate market, the literature, arguably, has yet to fully address the challenges and opportunities of sustainable development. In this regard, *Sustainability* is calling for papers for a Special Issue devoted to sustainable development and property markets. Suggested areas for contributions include, but are not limited to the following:

- sustainable property development
- corporate social responsibility and property
- sustainable property firms
- green buildings
- green property finance and investment
- carbon inequalities and property
- affordable housing
- housing affordability and carbon emissions
- response of property markets to climate change
- resilience of property markets to disasters

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
