# **Special Issue**

# Public-Private Partnerships: Development of Sustainable Projects

### Message from the Guest Editor

This Special Issue seeks to advance research on publicprivate partnerships (PPP) for the development of sustainable projects. Sustainable development projects that involve actors from both private and public sectors benefit from funding from both sectors, and research is needed on how different kinds of investors evaluate, govern, and benefit from PPPs, PPPs are needed because of the demand for public utility services, and research should be conducted on how public need for sustainable projects can be facilitated by public sector government, legislation, and private sector participation. These are usually used for infrastructure projects, such as rail, road, and hydropower, but the PPP model can also be applied to solar, wind energy, and eco-farming, as well as small-scale projects, such as bike lanes, local eco-farming, local car-sharing, housing, etc. In short, anything that is sustainable can benefit from the combination of public and private sector funding and knowledge sharing, but it is first necessary to develop models for such PPPs. This issue welcomes sustainable project development from a wide range of sustainability perspectives and academic disciplines.

## **About the Journal**

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

#### Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

#### **Author Benefits**

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### **High Visibility:**

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
