

Special Issue

Energy Transition, Tourism and Sustainable Management of Ecosystems

Message from the Guest Editor

Sustainability is well-connected with the protection and sustainable development of ecosystems and the biodiversity that constitutes them. However, human activities are the cause of irreversible harm to such ecosystems in multiple scenarios. The scope of this Special Issue is to create an “umbrella” under which impacts and benefits may be investigated and assessed in a variety of situations with different characteristics, such as the type of sustainable development project or the type of the sensitive ecosystem under review.

Research areas may include but are not limited to:

- Large power generation installations and their impacts on ecosystems;
- Green energy infrastructures;
- Marine power systems;
- Sustainable tourism in coastal regions;
- Energy transition through sustainable development;
- Carrying capacity of sensitive ecosystems;
- Green tourism—ecotourism and circular economy;
- Sustainable development in Natura 2000 regions;
- Local plans for sustainable tourism management;
- Local/regional co-creation plans to meet energy transition.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
