Special Issue

Resilience to Environmental Risks

Message from the Guest Editors

Due to the pervasive problems threatening ecosystems, scientists are increasingly interested in developing resilience strategies to lower environmental risk. Different concepts of resilience presume various assumptions about the system movement involved in resilience-based environmental risk and impact assessment. It is true that technical recovery dominates in the risk assessment literature, but this definition does not take into account the possibility that ecosystems exist in multiple regimes. This Special Issue, "Resilience to Environmental Risks" aims to add to the body of literature on chemical and pathogen contamination in the environment and to provide technical solutions to our dependence on water sources and their composition, considering regional, climatic. infrastructural and socioeconomic settings. This Special Issue will discuss system failure to show engineering resilience after disturbances, indicating a shift to a potentially undesired regime. We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
