

## Special Issue

# Responsible Supply Chain and the UN's Sustainable Development Goals

### Message from the Guest Editors

Over the past few decades, sustainability in supply chain management has drawn much attention from both academics and industry. Firms review their products and processes to deliver more environmentally friendly products and services and to pay attention to the social aspects of sustainability. The UN's Sustainable Development Goals accelerate this movement through a global supply chain network. The Special Issue of Sustainability titled 'Responsible Supply Chain and the UN's Sustainable Development Goals' aims to capture recent developments and challenges in responsible supply chains and the UN's sustainable development goals, focusing in particular on methodological innovation and recent advances in theoretical and empirical studies from multidisciplinary. We are particularly seeking new insights and empirical evidence to question existing practices and understanding of sustainable supply chain management.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
