Special Issue

Risk Theory and Sustainable Economy

Message from the Guest Editor

The actuarial mathematics provide a solid basement of the Risk Theory and they contain most of the features of the modern stochastic analysis. This endorses to approach the Economic Stability from rigorous and strict point of view and surpass the sociological ambiguities. From the other side the economical considerations and especially the equilibrium concepts are reinforcing the exploration of the stability structure and can bring new ideas in the way the safety and consistency are conceived and managed. This special issue targets to new contributions in understanding the Economical Stability. However, the special feature that gives the clue is the creative involvement of Risk Theory and further. the corresponding asymptotic results in the estimation of the ruin probability. Any approach from extreme value theory, probabilistic inequalities, stochastic differential equations, stochastic optimization, or statistical implementation are welcomed. The well grown mathematical background of Risk Theory can be used in improving the stability methodology.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
