Smart Cities and 4th Industrial Revolution: Applications for Sustainable Mobility Management and Inclusive Urban Logistics

Message from the Guest Editors

The communication and information technologies associated with the 4th Industrial Revolution have created a new paradigm for supporting urban planning by collecting and analyzing data in an integrated way, thus establishing the roots of Smart Cities. The Smart City concept has emerged to combat urban pressure and respond to climate change, while at the same time creating mechanisms to improve city inhabitants' quality of life. The COVID-19 pandemic has accelerated the necessity to re-think cities to ensure that they are prepared for climate hazards and extreme events. Furthermore, the new paradigm of fulfilling citizens' real-time needs and combatting isolation represents a significant effort of urban planners and policymakers. Thus, it will require closer collaboration and integration of stakeholders and the emergence of new logistical approaches. This Special Issue aims to collect works that propose conceptual approaches or present case studies of applications that consider shared and green transportation and urban logistics optimization models. The developed frameworks shall support policymakers to implement sustainable and inclusive Smart Cities.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon
School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
