

Special Issue

Smart Transportation and Intelligent and Connected Driving

Message from the Guest Editors

Transportation plays a significant role in promoting economic and social development. Improving mobility has become an important construction goal of transportation projects. However, with the continuous development of transportation systems, there also exist many problems affecting social security, energy efficiency, and environmental protection. In recent years, the application of intelligent and connected technologies has driven profound changes in transportation systems, which can be initially reflected by the changes in various modes of transportation, including land, water, and air transportation. Safer, more efficient, and more environmentally friendly transportation systems are emerging. In the process of the above transition, a series of interesting questions have been raised which are worthy of further discussion. To this end, the Special Issue entitled "Intelligent Transportation and Intelligent Connected Driving", which focuses on reviews or original research articles in related fields, has been organized.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
