

Special Issue

The Role of Social Life Cycle Assessment in Sustainability

Message from the Guest Editors

In this period of Covid-19, the circumstances have led us to face many questions and unexpected challenges. The point is, we have discovered that we are ready to change our way of living, also in terms of production and consumption. But to do so effectively, we need to better understand our models and patterns. Joining this Special Issue will give you a chance to join in the debate and get to know the methods and tools to use in this new period. This Special Issue aims to explore the role of social life cycle assessment in terms of methodological and applicative aspects within the framework of sustainability. This means we are particularly interested in receiving contributions that look into methodological developments by including scientific positioning, literature reviews, and lessons learned on main challenges and future trends, as well as practical applications. Besides, contributions on understanding the synergies and interlinkages between social life cycle assessment and other methods, tools and approaches as well as sustainable development goals, supply chain management, corporate social responsibility, sustainable production and consumption models, are encouraged.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
