

Special Issue

Sustainable Competitiveness and Economic Development

Message from the Guest Editors

The comprehensive assessment of sustainable competitiveness should also include the dimension of a sustainable competitive position. From this point of view, the relationships between sustainable development and competitiveness, as well between other areas connected with these terms as innovations (especially sustainable innovations, CSR, shared values, and sustainable business models, etc.), should also be considered. An important area in this field is also the methods of measuring (including indicators and methods of measurement) of sustainable competitiveness. The following potential areas for this Special Issue are welcome;

- proposals for defining and measuring sustainable competitiveness;
- sustainable competitiveness—opportunities and challenges;
- dimensions and levels of sustainable competitiveness;
- changes in the policy in terms of growth of needs to compete in the sustainable way;
- sustainable competitiveness and its impact on economic development;
- sustainable competitiveness and its relationships with other areas of the research;
- methods and measurements for sustainable competitiveness.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen
