Czestochowa, Poland

Deadline for manuscript
submissions:
closed (31 August 2019)

Message from the Guest Editor

Dear Colleagues,

Aspects of symmetry cover a wide range of physical, chemistry, and biological topics: they include nonlinear optics, nanoparticles, gravitation, biopolymers, etc. Both microscopical and phenomenological aspects exist here. Particular attention will be devoted to phenomena that are forbidden by symmetry following the macroscopical approach and may be allowed following the microscopical theory. Particular attention will be devoted to incommensurate superstructures and other topics, where the generally adapted symmetry aspects will be significantly modified.

Prof. Dr. Iwan Kityk

Special Issue

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Sergei Odintsov

ICREA, 08010 Barcelona and
Institute of Space Sciences (IEEC-
CSIC), C. Can Magrans s/n, 08193
Barcelona, Spain

Message from the Editor-in-Chief

Symmetry is ultimately the most important concept in natural sciences. It is not surprising then that very basic and fundamental research achievements are related to symmetry. For instance, the Nobel Prize in Physics 1979 (Glashow, Salam, Weinberg) was received for a unified symmetry description of electromagnetic and weak interactions, while the Nobel Prize in Physics 2008 (Nambu, Kobayashi, Maskawa) was received for the discovery of the mechanism of spontaneous breaking of symmetry, including CP symmetry. Our journal is named *Symmetry* and it manifests its fundamental role in nature.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within SCIE (Web of Science), Scopus, CAPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

Journal Rank: JCR - Q2 (Multidisciplinary Sciences) / CiteScore - Q1 (General Mathematics)
