Symmetry in Nonlinear and Convex Analysis

Guest Editors:

Prof. Dr. Lateef Olakunle Jolaoso
School of Mathematical Sciences, University of Southampton, Southampton SO17 1BJ, UK

Prof. Dr. Firas Ghanim Ahmed
Department of Mathematics, University of Sharjah, Sharjah P.O. Box 27272, United Arab Emirates

Dr. Chinedu Izuchukwu
Faculty of Mathematics, TECHNION - Israel Institute of Technology, Haifa 3200003, Israel

Deadline for manuscript submissions:
closed (1 March 2023)

Message from the Guest Editors

Dear Colleagues,

Nonlinear and convex analysis has become a very important tool in several branches of mathematics, including optimization problems, variational inequalities, equilibrium problems, differential equations, calculus of variation, fixed-point problems, etc. This Issue aims to attract original research works of high quality on nonlinear and convex analysis in relation with the notion of symmetry. Submissions are welcome in these areas and related fields.

Special Issue

Editor-in-Chief

Prof. Dr. Sergei D. Odintsov

Message from the Editor-in-Chief

Symmetry is ultimately the most important concept in natural sciences. It is not surprising then that very basic and fundamental research achievements are related to symmetry. For instance, the Nobel Prize in Physics 1979 (Glashow, Salam, Weinberg) was received for a unified symmetry description of electromagnetic and weak interactions, while the Nobel Prize in Physics 2008 (Nambu, Kobayashi, Maskawa) was received for the discovery of the mechanism of spontaneous breaking of symmetry, including CP symmetry. Our journal is named *Symmetry* and it manifests its fundamental role in nature.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.
Journal Rank: JCR - Q2 (*Multidisciplinary Sciences*) / CiteScore - Q1 (General Mathematics)
