Deadline for manuscript  
submissions:

**closed (29 February 2024)**

### Message from the Guest Editor

Dear Colleagues,

One of the most fundamental concepts in engineering and science is symmetry. This notion plays a crucial role in improving comprehension of intricate problems and also paves the way for meticulous perception.

Furthermore, nanoscience and nanotechnology have increasingly contributed to the promotion of the advent of engineering science in recent years. In the current Special Issue, the applications of symmetry will be chiefly investigated in relation to nanomaterials and nanofluids.

I am soliciting contributions (research and review articles) covering a broad range of topics on symmetry and nanotechnology, including (though not limited to) the following:

- Symmetry and nanofluid heat transfer;
- Symmetry and MHD or porous media;
- Symmetry and non-Newtonian fluid flow and heat transfer;
- Symmetry and nanomaterials;
- Symmetry and energy storage using PCM or NEPCM.

Submit your paper and select the Journal “*Symmetry*” and the Special Issue “Symmetry Applications in Nanofluids and Nanomaterials”. Our papers will be published on a rolling basis and we will be pleased to receive your submission once you have finished it.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

Symmetry is ultimately the most important concept in natural sciences. It is not surprising then that very basic and fundamental research achievements are related to symmetry. For instance, the Nobel Prize in Physics 1979 (Glashow, Salam, Weinberg) was received for a unified symmetry description of electromagnetic and weak interactions, while the Nobel Prize in Physics 2008 (Nambu, Kobayashi, Maskawa) was received for the discovery of the mechanism of spontaneous breaking of symmetry, including CP symmetry. Our journal is named *Symmetry* and it manifests its fundamental role in nature.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within SCIE (Web of Science), Scopus, CAPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

**Journal Rank:** JCR - Q2 (*Multidisciplinary Sciences*) / CiteScore - Q1 (General Mathematics)
