### Message from the Guest Editors

Dear Colleagues,

We would like to announce that in 2019 the Journal *Symmetry* will publish an additional Special Issue for the 32th Congress of the Jangjeon Mathematical Society (ICJMS2019), which will be held at Far Eastern Federal University, Vladivostok, Russia. The papers presented at this conference will be considered for publication in this Issue by the special Guest Editors. We would like to invite all the authors to this conference and to contribute to this Special Issue by submitting their work to *Symmetry* on the following subjects: pure and computational and applied mathematics and statistics, and mathematical physics (related to p-adic analysis, umbral algebra, and their applications)

## Message from the Editor-in-Chief

Symmetry is ultimately the most important concept in natural sciences. It is not surprising then that very basic and fundamental research achievements are related to symmetry. For instance, the Nobel Prize in Physics 1979 (Glashow, Salam, Weinberg) was received for a unified symmetry description of electromagnetic and weak interactions, while the Nobel Prize in Physics 2008 (Nambu, Kobayashi, Maskawa) was received for the discovery of the mechanism of spontaneous breaking of symmetry, including CP symmetry. Our journal is named *Symmetry* and it manifests its fundamental role in nature.
