## Frontiers in Complex Network Theory and Its Applications

Guest Editor:

**Dr. Tinggui Chen**

School of Statistics and  
Mathematics, Zhejiang  
Gongshang University, Hangzhou  
310018, China

Deadline for manuscript  
submissions:

**closed (15 May 2023)**

### Message from the Guest Editor

Dear Colleagues,

Stephen Hawking thinks the next century will be the century of complexity. A complex network is the basic structure of the complex system, and each complex system can be regarded as a network of interactions between units or individuals. It is a kind of angle and method to study complex systems. It focuses on the topological structure of the interaction of the factors in a system and is the basis to understand the properties and functions of a complex system. At present, complex network theory and methods have been widely used in network communication, community division, public opinion monitoring, cyber marketing and other fields, and also achieved great success. The purpose of this research topic is to collect the latest research results in this direction and attract more scholars to master as well as apply this method. The Research Topic welcomes submissions on the complex network theory and its applications. Potential topics include, but are not limited to Complex network concepts: random network, small world network, scale-free network, etc. For more information, please visit: [mdpi.com/journal/systems/special\\_issues/7R4027410A](https://mdpi.com/journal/systems/special_issues/7R4027410A)

## Editor-in-Chief

### Prof. Dr. Ben Clegg

Operations & Service  
Management Department, Aston  
Business School, Aston  
University, Birmingham B4 7ET,  
UK

## Message from the Editor-in-Chief

*Systems* is a leading venue for the quick and global dissemination of results of cutting-edge research in various areas of systems science and systems-related fields. An increasing number of researchers are realizing the enormous potential of systems thinking in managing the many unprecedented and complex issues in all areas of need. The *Systems* journal provides a home of exceptional quality for the manuscripts of these researchers who often find it difficult to publish their work in conventional discipline focused journals.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SSCI (Web of Science), Ei Compendex, dblp, and other databases.

**Journal Rank:** JCR - Q1 (Social Sciences, Interdisciplinary) / CiteScore - Q2 (Modeling and Simulation)
