

## Engineering Resilient Systems

Guest Editors:

**Prof. Dr. Gregory S. Parnell**

**Prof. Dr. Ed Pohl**

**Dr. Randy Buchanan**

**Dr. Eric Specking**

Deadline for manuscript  
submissions:

**closed (31 December 2020)**

### Message from the Guest Editors

Engineered systems are critical to the success of most private companies and public organizations. However, these systems have become more complex, interconnected, automated, and costly to develop, operate, and support in the face of changing environments and new competition/adversaries. A resilient engineered system can be defined as “A system that is able to successfully complete its planned mission(s) in the face of a disruption (environmental or adversarial) and has capabilities to perform future missions with evolving threats.” This definition highlights the challenges of meeting planned missions and future missions with uncertain adversarial threats. Engineering managers, project managers, systems engineers, and systems analysts need new techniques to assess the potential resilience of engineered systems during system development that will enable future system operators to maintain critical system capabilities with evolving threats. This Special Issue focuses on the engineered systems resilience evaluation of design and operational options to enable future capability and extend the system life cycle.

Chair, Department of Systems  
and Information Engineering,  
University of Virginia,  
Charlottesville, VA 22904, USA

## Message from the Editor-in-Chief

*Systems* is a leading venue for the quick and global dissemination of results of cutting-edge research in various areas of systems science and systems-related fields. An increasing number of researchers are realizing the enormous potential of systems thinking in managing the many unprecedented and complex issues in all areas of need. The *Systems* journal provides a home of exceptional quality for the manuscripts of these researchers who often find it difficult to publish their work in conventional discipline focused journals.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SSCI (Web of Science), dblp, and other databases.

**Journal Rank:** JCR - Q1 (Social Sciences, Interdisciplinary) / CiteScore - Q2 (*Modeling and Simulation*)
