The Systems Thinking Approach to Strategic Management

Guest Editors:

Prof. Dr. Federico Barnabè
Department of Business and Law, University of Siena, P.za S. Francesco 7, 53100 Siena, Italy

Prof. Dr. Martin Kunc
Department of Decision Analytics and Risk, University of Southampton, Southampton, UK

Deadline for manuscript submissions:
15 August 2024

Message from the Guest Editors

Dear Colleagues,

This Special Issue of Systems invites you to document the significant contribution of systems thinking to strategic management and propose new avenues for research into its integration. There have been multiple contributions by individual authors in different journals on topics related to strategic management, such as leadership, strategic planning, strategy design, visioning, scenarios, and balanced scorecards, using multiple strands of systems thinking, e.g., critical systems heuristics, critical systems thinking, soft systems methodology, systemic design, system dynamics, viable system models, etc. However, there must be a systematic evaluation of the use of systems thinking in strategic management, especially in the current global situation underpinned by complexity, uncertainty and turbulence.

Special Issue

Editor-in-Chief

Prof. Dr. William T. Scherer
Chair, Department of Systems
and Information Engineering,
University of Virginia,
Charlottesville, VA 22904, USA

Message from the Editor-in-Chief

Systems is a leading venue for the quick and global dissemination of results of cutting-edge research in various areas of systems science and systems-related fields. An increasing number of researchers are realizing the enormous potential of systems thinking in managing the many unprecedented and complex issues in all areas of need. The *Systems* journal provides a home of exceptional quality for the manuscripts of these researchers who often find it difficult to publish their work in conventional discipline focused journals.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SSCI (Web of Science), dblp, and other databases.
Journal Rank: JCR - Q2 (*Social Sciences, Interdisciplinary*) / CiteScore - Q2 (*Modeling and Simulation*)
