Data-Driven Decision Making for Complex Systems

Guest Editors:

Prof. Dr. Svajonė Bekešienė

Research Group on Logistics and
Defence Technology
Management, Lithuanian Military
Academy, Silo 5a, 10322 Vilnius,
Lithuania

Prof. Dr. Šárka MAYEROVÁ

Department of Mathematics and
Physics, University of Defence,
66210 Brno, Czech Republic

Dr. Marek Sedlačík

Department of Quantitative
Methods, University of Defence,
66210 Brno, Czech Republic

Deadline for manuscript
submissions:

1 July 2024

Message from the Guest Editors

Dear Colleagues,

This Special Issue is dedicated to establishing a scholarly foundation for data-driven decision making, with a specific focus on risk and education management within complex systems:

Risk Identification: Data analysis can uncover potential risks within complex systems by identifying patterns, anomalies, or factors that may lead to adverse events.

Risk Assessment: Data-driven models can quantify the likelihood and impact of identified risks, providing a structured way to prioritize and assess risks within the system.

Early Warning Systems: Complex systems can benefit from data-driven early warning systems that detect anomalies or deviations in real time, enabling proactive risk mitigation.

Scenario Analysis: Data analytics can be used to simulate various scenarios to assess the impact of potential risks, aiding in decision-making and risk response planning.

Education: Data-driven systems allow the enhancement of personal and systematic approaches to educational activities realization in light of modern technologies in the educational process.

Special Issue

systems

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. William T. Scherer

Chair, Department of Systems
and Information Engineering,
University of Virginia,
Charlottesville, VA 22904, USA

Message from the Editor-in-Chief

Systems is a leading venue for the quick and global dissemination of results of cutting-edge research in various areas of systems science and systems-related fields. An increasing number of researchers are realizing the enormous potential of systems thinking in managing the many unprecedented and complex issues in all areas of need. The *Systems* journal provides a home of exceptional quality for the manuscripts of these researchers who often find it difficult to publish their work in conventional discipline focused journals.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SSCI (Web of Science), dblp, and other databases.

Journal Rank: JCR - Q2 (*Social Sciences, Interdisciplinary*) / CiteScore - Q2 (*Modeling and Simulation*)
