submissions:
closed (30 April 2024)

Message from the Guest Editors

Dear Colleagues,

In this Special Issue, we invite the submission of research papers that specifically address decision making and policy analysis in transportation planning in the short- and long-run. The goal of this Special Issue is to cover the state-of-the-art contributions to data curation and analysis, model development, policy design, and system management. Topics of interest with a general focus on transportation planning include, but are not limited to:

- Social acceptance of planning policies;
- Investment in multimodal transportation systems;
- Travel behavior and mode choice of multiclass users;
- Public transportation and customized transit services;
- Emerging micromobility and ridesharing services;
- Carbon taxing and congestion pricing;
- Sustainability planning and zero-emission transport;
- Electric vehicles and charging infrastructure development;
- Automated vehicles and management policies.

Message from the Editor-in-Chief

Systems is a leading venue for the quick and global dissemination of results of cutting-edge research in various areas of systems science and systems-related fields. An increasing number of researchers are realizing the enormous potential of systems thinking in managing the many unprecedented and complex issues in all areas of need. The *Systems* journal provides a home of exceptional quality for the manuscripts of these researchers who often find it difficult to publish their work in conventional discipline focused journals.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SSCI (Web of Science), dblp, and other databases.

Journal Rank: JCR - Q1 (Social Sciences, Interdisciplinary) / CiteScore - Q2 (*Modeling and Simulation*)
