Dr. Ruth Hunter
Centre for Public Health, School of Medicine, Dentistry and Biomedical Sciences, Queen's University Belfast, Belfast, UK

Dr. Jason Thompson
Transport, Health and Urban Design Research Lab, Faculty of Architecture, Building and Planning, Melbourne School of Design, University of Melbourne, Melbourne, Australia

Deadline for manuscript submissions:
closed (31 December 2021)

Message from the Guest Editors

This Special Issue helps to address these two gaps by (a) providing a dedicated space for examples of systems practice in public health and (b) encouraging the submission of works that provide new insights on how complexity and systems concepts and methods can be used to understand and address public health issues.

Contributors are invited to present works that contain a strong practical application component regardless of the methodological approach used (e.g., case studies, modelling, surveys, experiments), providing it is adequate to investigate or intervene in complex systems. Examples of topics of interest related to systems practice in public health include, but are not limited to:

- Urban health;
- Health inequalities;
- Health-related behaviours;
- Methodological advances in systems practice in public health.
- Non-communicable diseases;
- Infectious diseases;
- Healthy ageing;
- Social determinants of health;
- Health policy and Health in All Policies;
- Health care services;

Special Issue

Editor-in-Chief

Prof. Dr. William T. Scherer
Chair, Department of Systems and Information Engineering, University of Virginia, Charlottesville, VA 22904, USA

Message from the Editor-in-Chief

Systems is a leading venue for the quick and global dissemination of results of cutting-edge research in various areas of systems science and systems-related fields. An increasing number of researchers are realizing the enormous potential of systems thinking in managing the many unprecedented and complex issues in all areas of need. The *Systems* journal provides a home of exceptional quality for the manuscripts of these researchers who often find it difficult to publish their work in conventional discipline focused journals.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SSCI (Web of Science), dblp, and other databases.
Journal Rank: JCR - Q1 (Social Sciences, Interdisciplinary) / CiteScore - Q2 (*Modeling and Simulation*)
