Prof. Dr. Wayne Wakeland

Systems Science Ph.D. Program,
Portland State University,
Portland, OR 97201, USA

Deadline for manuscript
submissions:

closed (31 July 2024)

Message from the Guest Editors

Dear Colleagues,

The notion of social–ecological systems (SEs), coupled systems of social and ecological components, has received growing attention. Governance neglecting either of the system components could lead to an undesirable state of both. Therefore, it is critical to understand the dynamic interactions between social and ecological systems.

Collecting state-of-the-art studies in system dynamics and agent-based models for social–ecological systems is highly beneficial to advance the field. We welcome any quality work contributing to the advancement of SEs studies using system dynamics or agent-based modeling, including their applications, modeling methodology, theoretical and conceptual discussion, and reviews.

Chair, Department of Systems
and Information Engineering,
University of Virginia,
Charlottesville, VA 22904, USA

Message from the Editor-in-Chief

Systems is a leading venue for the quick and global dissemination of results of cutting-edge research in various areas of systems science and systems-related fields. An increasing number of researchers are realizing the enormous potential of systems thinking in managing the many unprecedented and complex issues in all areas of need. The *Systems* journal provides a home of exceptional quality for the manuscripts of these researchers who often find it difficult to publish their work in conventional discipline focused journals.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SSCI (Web of Science), dblp, and other databases.

Journal Rank: JCR - Q1 (Social Sciences, Interdisciplinary) / CiteScore - Q2 (*Modeling and Simulation*)
