Deadline for manuscript
submissions:

closed (15 December 2021)

Message from the Guest Editors

Dear Colleagues,

This Special Issue of *Systems* invites you to discuss new ideas about design and optimization of multimedia systems.

Multimedia systems consist of many components, such as sensors, networks, processing and storage devices, and display devices. These components work together to provide a multimedia experience to the users. Moreover, it is difficult to measure the quality of multimedia services, since quality can differ depending on their applications. Accurate measurement of the quality of multimedia services, however, is important to optimize the system.

We are calling for contributions to multimedia system designs including VR/AR applications and quality metrics of the system. Topics of interest include: Multimedia system and its applications; Multimedia system performance evaluation; Multimedia system performance metrics; Multimedia system design etc. For further information about the topics of interest, please visit:

https://www.mdpi.com/journal/systems/special_issues/multimed

systems

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. William T. Scherer

Chair, Department of Systems
and Information Engineering,
University of Virginia,
Charlottesville, VA 22904, USA

Message from the Editor-in-Chief

Systems is a leading venue for the quick and global dissemination of results of cutting-edge research in various areas of systems science and systems-related fields. An increasing number of researchers are realizing the enormous potential of systems thinking in managing the many unprecedented and complex issues in all areas of need. The *Systems* journal provides a home of exceptional quality for the manuscripts of these researchers who often find it difficult to publish their work in conventional discipline focused journals.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SSCI (Web of Science), dblp, and other databases.

Journal Rank: JCR - Q2 (*Social Sciences, Interdisciplinary*) / CiteScore - Q2 (*Modeling and Simulation*)
