## System Dynamics: Insights and Policy Innovation

Guest Editors:

### **Prof. Dr. Khalid Saeed**

Department of Social Science  
and Policy Studies, Worcester  
Polytechnic Institute, 100  
Institute Road, Worcester, MA  
01609, USA

### **Dr. Karim J. Chichakly**

1. ISEE Systems, Inc., 31 Old Etna  
Road, Suite 7N, Lebanon, NH  
03766, USA  
2. Social Science and Policy  
Studies Department, Worcester  
Polytechnic Institute, 100  
Institute Rd., Worcester, MA  
01609, USA

Deadline for manuscript  
submissions:

**closed (30 September 2021)**

### **Message from the Guest Editors**

This Special Issue of *Systems* invites you to revive the original purpose of system dynamics – to bring new insights into understanding persistent problems and create policy innovations that make those problems go away. The models we encourage you to present need not precisely replicate history and give point forecasts of the future but should highlight a specific feature of reality representing a system appropriate for a purposeful analysis of a pervasive problem. Your models should be parsimonious, yet they should effectively highlight a problematic pattern – like in impressionist art. The policy innovations these models deliver should be operational, meaning they should not just be normative statements but should be able to be implemented through the policy levers available in the system.

We aim to collect 10–12 articles in this issue that are above expectations and can help us revive the insightful traditional practice of system dynamics. We look forward to receiving your submissions for consideration.

## Editor-in-Chief

### **Prof. Dr. William T. Scherer**

Chair, Department of Systems  
and Information Engineering,  
University of Virginia,  
Charlottesville, VA 22904, USA

## Message from the Editor-in-Chief

*Systems* is a leading venue for the quick and global dissemination of results of cutting-edge research in various areas of systems science and systems-related fields. An increasing number of researchers are realizing the enormous potential of systems thinking in managing the many unprecedented and complex issues in all areas of need. The *Systems* journal provides a home of exceptional quality for the manuscripts of these researchers who often find it difficult to publish their work in conventional discipline focused journals.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SSCI (Web of Science), dblp, and other databases.

**Journal Rank:** JCR - Q2 (*Social Sciences, Interdisciplinary*) / CiteScore - Q2 (*Modeling and Simulation*)
