

## Special Issue

# Ensemble Learning-Driven Models for Managerial System Modelling and Applications

### Message from the Guest Editors

We are pleased to invite submissions to a Special Issue titled “Ensemble Learning-Driven Models for Managerial System Modelling and Applications” in *Systems*. The aim of this Special Issue is to explore the latest developments and applications of ensemble learning techniques in the context of managerial systems. We welcome original research articles on topics including, but not limited to the following:

- Methods for combining ensemble learning techniques to optimize renewable energy sources management.
- Innovations in ensemble learning algorithms tailored for managerial applications.
- Ensemble methods for decision making in supply chain management.
- Forecasting and optimization using ensemble models in financial management systems.
- Application of ensemble learning in decision support systems.
- Applications of ensemble learning in business intelligence systems.
- ...

## About the Journal

### Message from the Editor-in-Chief

*Systems* is a leading venue for the quick and global dissemination of results of cutting-edge research in various areas of systems science and systems-related fields. An increasing number of researchers are realizing the enormous potential of systems thinking in managing the many unprecedented and complex issues in all areas of need. The *Systems* journal provides a home of exceptional quality for the manuscripts of these researchers who often find it difficult to publish their work in conventional discipline focused journals.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SSCI (Web of Science), dblp, and other databases.

#### Journal Rank:

JCR - Q1 (Social Sciences, Interdisciplinary) / CiteScore - Q2 (Modeling and Simulation)
