

Special Issue

The Intricate and Evolving Fabrics of Innovation Systems

Message from the Guest Editor

In addition to the debate on developing countries, this Special Issue intends to focus on the role of intermediary and non-governmental actors and the increasing internationalisation of the concept of innovation system. Examples of topics of interest to this Special Issue include:

- Inter-organizational linkages with regard to knowledge creation, diffusion and exploitation.
- The impact of the international dimension on innovation systems.
- Re-conceptualising and adapting the ideas behind the major innovation systems to developing countries.
- The impact of proximity (geographical, social, cognitive, cultural etc) on innovation systems.
- Role of intermediary firms which act as 'bridging institutions' within innovation systems.
- Systems of innovation and open innovation.
- The role of the state in shaping their innovation systems.
- Higher education system and innovation systems.

About the Journal

Message from the Editor-in-Chief

Systems is a leading venue for the quick and global dissemination of results of cutting-edge research in various areas of systems science and systems-related fields. An increasing number of researchers are realizing the enormous potential of systems thinking in managing the many unprecedented and complex issues in all areas of need. The *Systems* journal provides a home of exceptional quality for the manuscripts of these researchers who often find it difficult to publish their work in conventional discipline focused journals.

Editor-in-Chief

Prof. Dr. William T. Scherer

Chair, Department of Systems and Information Engineering, University of Virginia, Charlottesville, VA 22904, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), dblp, and other databases.

Journal Rank:

JCR - Q1 (Social Sciences, Interdisciplinary) / CiteScore - Q2 (Modeling and Simulation)
