Scheduling and Optimization in Production and Transportation Systems

Message from the Guest Editors

Production systems and transportation systems are inherently complex due to various complex factors such as various dynamic disruptions, capacity limitations, and large-scale problems. Scheduling plays a crucial role in both production and transportation systems. However, these complex factors make mathematical modeling and obtaining optimal solutions highly challenging, often necessitating a trade-off between computational performance and solution quality. Scheduling and optimization are crucial components in this new industrial paradigm. By leveraging real-time data, advanced analytics, and automation, businesses can achieve unprecedented levels of efficiency, agility, and sustainability. This involves the strategic allocation of resources and the sequencing of tasks to maximize efficiency, reduce costs, and improve overall system performance. Therefore, comprehensive applications of various optimization methodologies hold enormous potential in addressing challenges in production and transportation systems.

About the Journal

Message from the Editor-in-Chief

Systems is a leading venue for the quick and global dissemination of results of cutting-edge research in various areas of systems science and systems-related fields. An increasing number of researchers are realizing the enormous potential of systems thinking in managing the many unprecedented and complex issues in all areas of need. The *Systems* journal provides a home of exceptional quality for the manuscripts of these researchers who often find it difficult to publish their work in conventional discipline focused journals.

Editor-in-Chief

Prof. Dr. William T. Scherer

Chair, Department of Systems and Information Engineering, University of Virginia, Charlottesville, VA 22904, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), Ei Compendex, dblp, and other databases.

Journal Rank:

JCR - Q1 (Social Sciences, Interdisciplinary)
