Message from the Guest Editor

Dear Colleagues,

The functional and psychosocial impacts of rehabilitation and assistive technologies are critical factors for their adoption and successful use by persons who have disabilities. There has been significant international research on measuring these factors, using a variety of approaches and tools. This Special Issue is intended to report the progress that has been made in advancing the widest international application of outcome measurements in this field, and the important gaps in knowledge that still remain. Articles in this Special Issue will address topics that include: the value of outcome measurement; description of frameworks, tools, and systems for measurement; and identification of unmet needs for measurement for underserved populations of technology users

Message from the Editor-in-Chief

Technologies, provides a single focus for reporting on developments of all technologies, regardless of their application. It is our intention that *Technologies* becomes the journal of choice for both researchers wanting to publish their work and technologists wishing to exploit the high quality research across a wide range of potential applications. Through its open access policy, its quick publication cycle, *Technologies* will facilitate the rapid uptake and development of the research presented, ultimately providing benefit to the wider society.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within ESCI (Web of Science), Scopus, Inspec, INSPIRE, and other databases.

Journal Rank: JCR - Q1 (Engineering, Multidisciplinary) / CiteScore - Q1 (Computer Science (miscellaneous))
