Message from the Guest Editors

Dear Colleagues,

Occupational populations are always being co-exposed to multiple hazards in their working environments. However, previous studies have often focused on the exposure assessment, health risk assessment, and molecular mechanisms of a single hazard, resulting in substantial knowledge gaps regarding the extent of multiple simultaneous exposures in working environments. Thus, this Special Issue aims to share new information on the biomonitoring and exposure assessment of multiple occupational hazards and to assess their co-exposure effects on workers' health and the underlying mechanisms. Innovative articles responding to this issue should report original findings, reviews, and methods relevant to biomonitoring and exposure assessment of multiple hazards in occupational environments.

Message from the Editor-in-Chief

Toxics (ISSN 2305-6304) is an international, peer-reviewed, open access journal which provides an advanced forum for studies related to all aspects of toxic chemicals and materials. We aim to publish high quality work that furthers our understanding of the exposure, effects, and risks of chemicals and materials in humans and the natural environment as well as approaches to assess and/or manage the toxicological and ecotoxicological risks of chemicals and materials. Please consider publishing in *Toxics* when preparing your next paper.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [Embase](#), [CAPus / SciFinder](#), [AGRIS](#), and [other databases](#).

Journal Rank: JCR - Q1 (Toxicology) / CiteScore - Q1 (Chemical Health and Safety)
