Deadline for manuscript submissions:

closed (31 August 2024)

Message from the Guest Editor

The wide use of pesticides brings many uncertainties for the ecological environment. Ecological risk assessment is crucial for evaluating the potential effects of pesticide on ecosystems, including evaluating toxicity, persistence, potential for bioaccumulation, and so on. The potential effects on non-target organisms such as birds, bees, aquatic organisms, and environmental matrices such as soil, water, and air should be considered. Ecological risk assessment also includes the comprehensive understanding on the specific characteristics of pesticides, the target organisms, the potential exposure pathways, the interactions between pesticides and the environment, and the long-term effects for the ecosystem. Chiral pesticides and their combined pollution are also worth a consideration. Ecological risk assessment will provide regulators, policymakers, and stakeholders with the information needed to make informed decisions about the use of pesticides, which plays a critical role in the rational use of pesticides and in minimizing their negative effects.

Message from the Editor-in-Chief

Toxics (ISSN 2305-6304) is an international, peer-reviewed, open access journal which provides an advanced forum for studies related to all aspects of toxic chemicals and materials. We aim to publish high quality work that furthers our understanding of the exposure, effects, and risks of chemicals and materials in humans and the natural environment as well as approaches to assess and/or manage the toxicological and ecotoxicological risks of chemicals and materials. Please consider publishing in *Toxics* when preparing your next paper.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [Embase](#), [CAPlus / SciFinder](#), [AGRIS](#), and [other databases](#).

Journal Rank: JCR - Q1 (Toxicology) / CiteScore - Q2 (*Chemical Health and Safety*)
