Monitoring and Modeling Atmospheric Toxic Substances and Their Influence on Human Health

Guest Editor:

Prof. Dr. Tania Mascarenhas Tavares

Health Environment and Work Program, School of Medicine, Federal University of Bahia (UFBA), Salvador, Brazil

Deadline for manuscript submissions:

30 October 2024

Message from the Guest Editor

Dear Colleagues,

Monitoring and modeling atmospheric toxic substances and their influence on human health are complex and multifaceted endeavors that require the careful consideration of several aspects. Furthermore, as environmental conditions and human activities evolve, new challenges may arise in monitoring and modeling atmospheric toxic substances. This Special Issue invites contributions that cover all aspects of the topic, with particular emphasis on the following: revising and re-evaluating databases grounded in current knowledge and concerns; reporting on unidentified or poorly quantified sources contributing to air pollution; modeling spatial and temporal variability depending on an individual's location, activities, and time spent in various environments; assessing the health impact of air toxics considering clear dose–response relationships; tackling the assessment of low-level exposure to multiple toxics; assessing health effects from exposure to toxic substances considering the variability in susceptibility; and other challenges in monitoring and modeling atmospheric toxic substances affecting human health.

Message from the Editor-in-Chief

Toxics (ISSN 2305-6304) is an international, peer-reviewed, open access journal which provides an advanced forum for studies related to all aspects of toxic chemicals and materials. We aim to publish high quality work that furthers our understanding of the exposure, effects, and risks of chemicals and materials in humans and the natural environment as well as approaches to assess and/or manage the toxicological and ecotoxicological risks of chemicals and materials. Please consider publishing in *Toxics* when preparing your next paper.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [Embase](#), [CAPlus / SciFinder](#), [AGRIS](#), and [other databases](#).

Journal Rank: JCR - Q1 (Toxicology) / CiteScore - Q2 (*Chemical Health and Safety*)
