Deadline for manuscript
submissions:

15 January 2025

Message from the Guest Editors

Dear Colleagues,

Our goal is to establish a collection of studies that not only reflect the current state of the art but also point the way toward future advancements in aerosol science and its impact on public health.

Objectives:

- **Source Apportionment:** Investigations focusing on identifying and quantifying the major sources of atmospheric aerosols.
- **Chemical Characterization:** Research that advances our understanding of the chemical composition of aerosols, including both organic and inorganic species.
- **Health Effect:** To examine the mechanisms via which aerosols interact with human health, including respiratory issues, cardiovascular diseases, and potential long-term health effects.
- **Policy Implications and Mitigation Strategies:** Discussions on the policy implications of aerosol research and the development of effective mitigation strategies.

We invite researchers, scientists, and scholars to contribute their original research, review articles, and short communications that address the themes outlined above. Manuscripts should present novel findings, innovative approaches, and significant advancements in the field of aerosol science and its implications for human health.

Message from the Editor-in-Chief

Toxics (ISSN 2305-6304) is an international, peer-reviewed, open access journal which provides an advanced forum for studies related to all aspects of toxic chemicals and materials. We aim to publish high quality work that furthers our understanding of the exposure, effects, and risks of chemicals and materials in humans and the natural environment as well as approaches to assess and/or manage the toxicological and ecotoxicological risks of chemicals and materials. Please consider publishing in *Toxics* when preparing your next paper.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [Embase](#), [CAPlus / SciFinder](#), [AGRIS](#), and [other databases](#).

Journal Rank: JCR - Q1 (Toxicology) / CiteScore - Q2 (*Chemical Health and Safety*)
