Message from the Guest Editors

Dear Colleagues,

Particulates, viruses, and VOCs are major pollutants in multiuse places that are known to be generated from various factors, such as human activities, cooking, and the inflow of outside air through the windows and ventilation systems. Epidemiological studies show that exposure to indoor air pollutants (IAP) is highly hazardous to the body since it raises the sensible pollution level and, along with it, is the possible occurrence of disease and death rates. As IAP concentrations measured in multiuse places are generally higher and more toxic than those in the air, they play a major role in deteriorating indoor air quality and as such require proper control.

This Special Issue aims to focus on control technologies in indoor places such as public, private buildings, and multiuse facilities.

Message from the Editor-in-Chief

Toxics (ISSN 2305-6304) is an international, peer-reviewed, open access journal which provides an advanced forum for studies related to all aspects of toxic chemicals and materials. We aim to publish high quality work that furthers our understanding of the exposure, effects, and risks of chemicals and materials in humans and the natural environment as well as approaches to assess and/or manage the toxicological and ecotoxicological risks of chemicals and materials. Please consider publishing in *Toxics* when preparing your next paper.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [Embase](#), [CAPlus / SciFinder](#), [AGRIS](#), and [other databases](#).

Journal Rank: JCR - Q1 (Toxicology) / CiteScore - Q2 (*Chemical Health and Safety*)
