Overview of Forensic Toxicology, Yesterday, Today and in the Future

Guest Editors:

Dr. Antonina Argo

Pro.Mi.Se. Department, University
of Palermo, 90133 Palermo, Italy

Dr. Marija Caplinskiene

State Forensic Medicine Service,
Mykolas Romeris University,
Vilnius, Lithuania

Deadline for manuscript
submissions:

30 June 2024

Message from the Guest Editors

Forensic toxicology is currently facing the challenges of great analytical complexity and of increasingly sophisticated interpretative models of laboratory parameters. These developments imply a continued improvement in the investigative methodologies useful for the evaluation of xenobiotics both in living and in post-mortem samples. This Special Issue of *Toxics* aims to explore all areas of scientific research concerning traditional and emerging substances of abuse, inviting elaborations of their forensic and clinical implications; discussions of analytical approaches to different samples of the human body; the impact of drugs on human health and behavior, with a focus on vulnerable populations such as child exposed to drugs of abuse; adverse drug events in inmates; guidelines on medical approaches to maintenance and tolerance treatment, drug misuse and related death. Interdisciplinary and integrated forensic toxicology studies that meet these requirements are welcomed by this Special Issue.

Message from the Editor-in-Chief

Toxics (ISSN 2305-6304) is an international, peer-reviewed, open access journal which provides an advanced forum for studies related to all aspects of toxic chemicals and materials. We aim to publish high quality work that furthers our understanding of the exposure, effects, and risks of chemicals and materials in humans and the natural environment as well as approaches to assess and/or manage the toxicological and ecotoxicological risks of chemicals and materials. Please consider publishing in *Toxics* when preparing your next paper.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [Embase](#), [CAPlus / SciFinder](#), [AGRIS](#), and [other databases](#).

Journal Rank: JCR - Q1 (*Toxicology*) / CiteScore - Q2 (*Chemical Health and Safety*)
