Deadline for manuscript submissions:

31 October 2024

Message from the Guest Editor

Dear Colleagues,

Heavy metals are omnipresent in our daily lives, and dietary exposure is the primary source of heavy metal intake in the human body. However, given the vast variety of foods, different types of heavy metals are present in various diets. Hence, exploring the impact of heavy metal exposure through dietary intake on human health is worthy of investigation.

This Special Issue aims to collect more research reports related to heavy metal exposure through dietary pathways. Beyond the commonly studied heavy metals, including arsenic, cadmium, lead, etc., we are particularly interested in reports about other harmful heavy metals found in different types of food. We encourage studies that explore the potential health risks resulting from the human consumption of these metals. Whether the findings come from small-scale community studies or large-scale national surveys, your submissions are welcome.

Message from the Editor-in-Chief

Toxics (ISSN 2305-6304) is an international, peer-reviewed, open access journal which provides an advanced forum for studies related to all aspects of toxic chemicals and materials. We aim to publish high quality work that furthers our understanding of the exposure, effects, and risks of chemicals and materials in humans and the natural environment as well as approaches to assess and/or manage the toxicological and ecotoxicological risks of chemicals and materials. Please consider publishing in Toxics when preparing your next paper.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank: JCR - Q1 (Toxicology) / CiteScore - Q2 (Chemical Health and Safety)
