Message from the Guest Editor

Tobacco use remains a leading cause of preventable disease, disability, and death. In May 2020, the World Health Organization (WHO) reported that tobacco use was responsible for greater than 8 million annual deaths globally.

The 2018 United States National Academies of Sciences, Engineering, and Medicine report, “The Public Health Consequences of E-cigarettes”, found substantial evidence that use of ENDS leads to dependence; however, there is only moderate evidence that the risk and severity of dependence are lower for ENDS than for combusted tobacco cigarettes.

This *Toxics* Special Issue welcomes research that aims to characterize and understand novel tobacco products along with their related health effects. Research studying the general use of flavors in tobacco products is also of interest. This Special Issue aims to add to the science that will inform tobacco control policy and regulatory actions on emerging tobacco products such as ENDS, HTPs, and novel smokeless tobacco products.

Message from the Editor-in-Chief

Toxics (ISSN 2305-6304) is an international, peer-reviewed, open access journal which provides an advanced forum for studies related to all aspects of toxic chemicals and materials. We aim to publish high quality work that furthers our understanding of the exposure, effects, and risks of chemicals and materials in humans and the natural environment as well as approaches to assess and/or manage the toxicological and ecotoxicological risks of chemicals and materials. Please consider publishing in *Toxics* when preparing your next paper.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [Embase](#), [CAPlus / SciFinder](#), [AGRIS](#), and [other databases](#).

Journal Rank: JCR - Q1 (Toxicology) / CiteScore - Q2 (*Chemical Health and Safety*)
