Message from the Guest Editor

Dear Colleagues,

Botulinum toxin was approved by the FDA in 2011 for neurogenic bladder and in 2013 for idiopathic overactive bladder. For this Special Issue, we would like to address the question of where we stand with this therapy a decade later: has it prevailed and been proven useful? Which techniques have become established, and how were they optimized? Are there more practical ways of distribution on the way? What obstacles/acceptance problems might there be from patients or doctors in (long-term) use? What are the risks, if any? Has the therapy gained a foothold in the outpatient sector?

Message from the Editor-in-Chief

Toxinology is an incredibly diverse area of study, ranging from field surveys of environmental toxins to the study of toxin action at the molecular level. The editorial board and staff of *Toxins* are dedicated to providing a timely, peer-reviewed outlet for exciting, innovative primary research articles and concise, informative reviews from investigators in the myriad of disciplines contributing to our knowledge on toxins. We are committed to meeting the needs of the toxin research community by offering useful and timely reviews of all manuscripts submitted. Please consider *Toxins* when submitting your work for publication.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus**, **SCIE (Web of Science)**, **PubMed**, **MEDLINE**, **PMC**, **Embase**, **CAPLus / SciFinder**, **AGRIS**, and **other databases**.

Journal Rank: JCR - Q1 (*Toxicology*) / CiteScore - Q1 (*Toxicology*)
