Deadline for manuscript
submissions:

30 November 2024

Message from the Guest Editors

Aflatoxin-producing fungi from *Aspergillus* species infect and contaminate food and feed crops. Although aflatoxins are highly regulated, contamination of the food supply is still a global concern. In addition to aflatoxins, *Aspergillus* fungi produce many other secondary metabolites, which are currently unregulated. Several of these metabolites are known to be toxic, yet the toxicity and function of the majority of *Aspergillus*-produced metabolites are largely unknown. This Special Issue of *Toxins* aims to highlight regulated and unregulated toxins and other metabolites produced by *Aspergillus* spp., alongside methods to mitigate these metabolites in the food supply.

Editor-in-Chief

Prof. Dr. Jay Fox

Department of Microbiology,
University of Virginia,
Charlottesville, VA, USA

Message from the Editor-in-Chief

Toxinology is an incredibly diverse area of study, ranging from field surveys of environmental toxins to the study of toxin action at the molecular level. The editorial board and staff of *Toxins* are dedicated to providing a timely, peer-reviewed outlet for exciting, innovative primary research articles and concise, informative reviews from investigators in the myriad of disciplines contributing to our knowledge on toxins. We are committed to meeting the needs of the toxin research community by offering useful and timely reviews of all manuscripts submitted. Please consider *Toxins* when submitting your work for publication.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, AGRIS, and other databases.**

Journal Rank: JCR - Q1 (Toxicology) / CiteScore - Q1 (Toxicology)
