Message from the Guest Editors

Dear Colleagues,

Botulinum neurotoxin (BoNT) is an established and licensed treatment in a number of clinical conditions in neurology, neurorehabilitation and pain medicine, including, e.g., spasticity, dystonia, other movement disorders, chronic migraines, neuropathic pain, and other headache and pain disorders.

This Special Issue aims to present the state-of-the-art therapeutic mechanisms and indications in pain, spasticity, movement disorders, and combined clinical conditions.

Appropriate submissions for this Special Issue include reviews, systematic reviews and meta-analyses, as well as original studies. Preclinical, clinical and experimental studies in humans will be welcome.

Message from the Editor-in-Chief

Toxinology is an incredibly diverse area of study, ranging from field surveys of environmental toxins to the study of toxin action at the molecular level. The editorial board and staff of *Toxins* are dedicated to providing a timely, peer-reviewed outlet for exciting, innovative primary research articles and concise, informative reviews from investigators in the myriad of disciplines contributing to our knowledge on toxins. We are committed to meeting the needs of the toxin research community by offering useful and timely reviews of all manuscripts submitted. Please consider *Toxins* when submitting your work for publication.
