Hospital, Matsudo, Chiba, Japan

Deadline for manuscript  
submissions:

**closed (15 June 2023)**

### Message from the Guest Editor

Dear Colleagues,

Chronic kidney disease is a systemic disease that causes many complications that seem to be unrelated to the kidneys. These complications contribute to the high morbidity and mortality of those affected and their poor quality of life. Above all, life-threatening complications require early detection and early responses. We aim to provide readers of this Special Issue with information about the complications of chronic kidney disease, including basic features and the latest knowledge in this field.

This Special Issue is devoted to publishing original research and high-quality review articles related to recent advances in the complications of chronic kidney disease. Original investigations, including both clinical and basic sciences studies, as well meta-analyses and scholarly review papers will be considered.

Dr. Eiichi Sato

## Message from the Editor-in-Chief

Toxinology is an incredibly diverse area of study, ranging from field surveys of environmental toxins to the study of toxin action at the molecular level. The editorial board and staff of *Toxins* are dedicated to providing a timely, peer-reviewed outlet for exciting, innovative primary research articles and concise, informative reviews from investigators in the myriad of disciplines contributing to our knowledge on toxins. We are committed to meeting the needs of the toxin research community by offering useful and timely reviews of all manuscripts submitted. Please consider *Toxins* when submitting your work for publication.

## Author Benefits

**Open Access:** free for readers, with **article processing charges (APC)** paid by authors or their institutions.

**High Visibility:** indexed within **Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, AGRIS, and other databases.**

**Journal Rank:** JCR - Q1 (Toxicology) / CiteScore - Q1 (Toxicology)
