closed (31 May 2023)

Message from the Guest Editors

Dear Colleagues,

This Special Issue is dedicated to L. Pasteur in celebration of the bicentenary of his birth. L. Pasteur was a chemist and one of the founding fathers of microbiology. Certain microorganisms were found to be responsible for specific diseases, and L. Pasteur developed the concept that attenuated pathogens can induce a protective response. Later, his collaborators identified that some pathogenic bacteria secrete soluble factors, named toxins, which are responsible for the symptoms and lesions of diseases. The aim of this Special Issue is to trace the long history of L. Pasteur and the contribution of Institut Pasteur scientists in the field of toxins.

Message from the Editor-in-Chief

Toxinology is an incredibly diverse area of study, ranging from field surveys of environmental toxins to the study of toxin action at the molecular level. The editorial board and staff of *Toxins* are dedicated to providing a timely, peer-reviewed outlet for exciting, innovative primary research articles and concise, informative reviews from investigators in the myriad of disciplines contributing to our knowledge on toxins. We are committed to meeting the needs of the toxin research community by offering useful and timely reviews of all manuscripts submitted. Please consider *Toxins* when submitting your work for publication.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, AGRIS, and other databases.**

Journal Rank: JCR - Q1 (Toxicology) / CiteScore - Q1 (Toxicology)
