Deadline for manuscript
submissions:

closed (30 December 2022)

Message from the Guest Editor

Dear Colleagues,

Botulism still represents a big concern for both human and veterinary public health authorities. In the last three decades, the epidemiological picture of the disease has profoundly changed. Increased consumer demand for low processed foods, innovative food processing technologies, advances in farming practices, and climate change pose new challenges in the development of control and prevention strategies. Although significant improvements in knowledge have arisen from illuminating research activities, several aspects remain unclear. This Special Issue will focus on the insights gained and advancements made in improving the diagnosis, treatment, control, and prevention of human and animal botulism, filling in the gaps in knowledge.

Message from the Editor-in-Chief

Toxinology is an incredibly diverse area of study, ranging from field surveys of environmental toxins to the study of toxin action at the molecular level. The editorial board and staff of *Toxins* are dedicated to providing a timely, peer-reviewed outlet for exciting, innovative primary research articles and concise, informative reviews from investigators in the myriad of disciplines contributing to our knowledge on toxins. We are committed to meeting the needs of the toxin research community by offering useful and timely reviews of all manuscripts submitted. Please consider *Toxins* when submitting your work for publication.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, AGRIS, and other databases.**

Journal Rank: JCR - Q1 (Toxicology) / CiteScore - Q1 (Toxicology)
